

45001 Safety Essentials Course

This 45001 Safety training course enables you to learn how to implement and manage an effective Safety Management System (SMS) including information on the new international safety standard - ISO 45001

Course Outline

ISO 45001 is the much anticipated new international safety management system standard. The safety essentials course is a dynamic and interactive workshop designed to provide a basic overview and contextualised introduction to ISO 45001 which is centred on practical application in your business. In addition to this, the Safety essentials course will highlight the key differences between ISO 45001 and the existing safety management system standards; AS/NZS 4801 and OHSAS 18001. Upon completion of the course, participants should have a basic knowledge of the requirements of the standard and how they apply.

Learning Outcomes

The safety essentials course covers the following learning outcomes:

- Basic understanding of the new international standard ISO 45001
- The role of leadership in safety
- How to develop the framework for your safety system
- Develop a framework for objectives and targets
- Start planning your internal audit and incident management
- Hazard identification and risk assessment
- Considerations for emergency response planning

Who should attend?

The safety essentials course is suitable for all those keen to develop an understanding of ISO 45001 and how it practically applies in the work place. This course is suited to those new to safety system certification, as well as those looking to migrate from AS/NZS 4801 and OHSAS 18001 to the new standard. There are no entry requirements for this course.
